

Module 6 Verification of Proficiency (VOP) Tasks

		Y	N
1	Grasps and elevates the gallbladder laterally		
2	Demonstrates an adequate view of gallbladder hilum		
3	Dissects the avascular planes around the gallbladder		
4	Identifies anatomy of the cystic duct, cystic artery, common hepatic duct, and common bile duct by pointing to each with an instrument.		
5	Ligates cystic artery by placing two ties proximally and one tie distally		
6	Performs intracorporeal knot with a surgeon's knot followed by two additional throws on all ties		
7	Transects cystic artery sharply		
8	Ligates cystic duct by placing two ties proximally and one tie distally		
9	Performs intracorporeal knot with a surgeon's knot followed by two additional throws on all ties		
10	Transects cystic duct sharply		
11	Dissects the gallbladder off of liver using scissors		
12	Avoids injury to the liver when performing dissection of the gallbladder from the liver		
13	Avoids perforating the gallbladder		
14	Places gallbladder into containment bag		
15	Avoids injury to the common bile duct		
16	Avoids injury to the duodenum		
17	Removes gallbladder from abdomen
