

Welcome to the Agrivoltaics-Agrotunnel

Our goal is to create the optimum growing environment for our plants. Keeping our plants safe from pests allows us to grow without the use of herbicides or pesticides.

Our plants need your help with maintaining that biosecurity, so we ask for your assistance with these preventative measures:

1. Please do not enter the Agrotunnel without permission.
2. Pests like to hitch a ride, so please visit the Agrotunnel before any outside activities in the fields or grassy areas around the Agrotunnel.
3. Do not enter the Agrotunnel if you have been in another growing space on the same day.
4. Please ensure that all inside and outside doors are firmly closed at all times.
5. Please remove outdoor footwear within the marked area. Indoor shoes and disposable covers are available for your visit.
6. Please sanitize your hands upon entering.
7. Not feeling well? Please use a mask. We have extras available upon request.
8. Please tie back any long hair. We have ties available.
9. No food or drink items allowed in the Agrotunnel growing space.
10. Please do not touch any plants or equipment unless invited by our team members to do so.
11. Please respect the cleanliness of the area. A clean growing space means happy, healthy plants!

Our Team & Our Plants Thank You!
